SOVIET ARMY SUPPLY AND TRANSPORTATION

A. SOVIET ARMY SUPPLY

25X1

2. Rear Services and Supply Procedure

the word "rear" meant any area behind the front

line troops.

25X1

the section leader was responsible for all supplies. He drew them directly from the regimental clothing and equipment (OVS - Obozno veshchewogo snabzheniya) warehouse and the regimental ration (PFS - Prodovolstvenno furazhnogo snabzheniya) dump.

In each battery the first sergeant maintained a small supply room for issue of expendables such as scap, toilet paper, brooms, and brushes. He was responsible to the battery CO for receiving other equipment and supplies from the regimental clothing and equipment warehouse.

house and a PFS warehouse headed by an officer.

there was a Chief of Rear Services and Supply at division level.

Services and Supply was responsible for all supply of the 23d.

25X1

3. Evacuation

to induction.
basic training

one hour of first aid training prior additional first aid training during

dillo.

transport

See also subpar A4b. It was approximately threefourths of a kilometer to the 36th AAA Regt. supply points and four kilometers to the 64th AAA Regt. supa US-made 3/4-ton Dodge truck and ply points. occasionally a US-made laton Ford truck to pick up rations, clothing, and FOL products and to make deliveries and pickups of laundry and articles sent to the shoe repair and tailor shops.

Laundry was picked up and delivered weekly. Rations were drawn two or three times weekly.

Regimental supply levels were maintained by motor

25X1

c. Vehicles of the regiments and division headquarters were used to move supplies to regiments and to division headquarters. a US-made 3/4-ton Dodge 25X1 truck and a Ford truck.

three vehicles; an Opel-Kapitan 25X1 passenger car, a US-made 12-ton Ford truck and a US-made 3/4-ton Dodge truck. The Opel and the Ford truck belonged to the Directcrate of Counterintelligence and the Dodge truck belonged to the 23d AAA Div.

25X1

e. There was no horse-drawn transportation in the 23d AAA Div. 25X1

25X1

Several drums were drawn at once and stored in the yard outside the section. Gasoline drums were similar to US 55gal. drums. 25X1

h. In addition to foreign vehicles (see subpar A5d, above) there were many US-made Studebaker trucks in each regiment of the 23d AAA Div.

approximately four or five USmade Ford li-ton trucks and 3/4-ton Dodge trucks in both the 36th

AAA and 64th AAA Regts.

The largest percentage of transport vehicles in the regiments of the 23d AAA Div.were Soviet GAZ-63. These served as transports and prime movers of the AAA pieces. Occasionally a Studebaker truck was used as a prime mover of AAA pieces.

25X1 CONFIDENTIAL - 11 -2. Rail Movement 25X1 25X1 information on car loading practices: (1) T-34 and JS-3 tanks were side-25X1 loaded whenever possible. (2) a side loading method was the fastest, prov-ided that stations had loading platforms the height of a flat car 25X1 so that heavy equipment could be driven directly on a flat car. In the USSR every freight depot had solid reinforced con-25X1 crete platforms to facilitate the loading of both military and civilian heavy equipment by the side loading method. it was impossible to load 25X1 more than one tank of any type on a flat car because a flat car was too weak to support the weight. 25X1 every large station in the USSE had its own rolling stock in large reserve quantities. 25X1 25X1 1. At CHOP (4825N-2211E) There was no cargo to be reloaded. saw no evidence of construction to indicate any plans to accommodate both types of rolling stock. 3. Motor Transport motor transport was widely used by 25X1 · the Soviets to move men and material short distances only; that is, less than 50 - 70 km. All heavy equipment, even though self-powered, was moved by rail almost exclusively. It was cheaper, and was the only manner in which a majority of heavier equipment could be moved.
